

INDEX TO VOLUME 142

Alphabetical Table of Contents of Authors

- ADOLPH, STEPHEN C., and WARREN P. PORTER. Temperature, activity, and lizard life histories, 273
- ANHOLT, BRADLEY R. See EARL E. WERNER
- ANTONOVICS, JANIS. See PETER H. THRALL
- AUTUMN, KELLAR. See F. STUART CHAPIN III
- AVILÉS, LETICIA. Interdemic selection and the sex ratio: a social spider perspective, 320
- BELL, MICHAEL A. See CARL P. LOBUE
- BENNETT, ALBERT F. See RICHARD E. LENSKI
- BERRIGAN, D. See E. L. CHARNOV
- BERTNESS, MARK D., and SCOTT W. SHUMWAY. Competition and facilitation in marsh plants, 718
- BEUKEBOOM, LEO W. See JOHN H. WERREN
- BIRKHEAD, T. R. See A. P. MÖLLER
- BOUCOT, ARTHUR J. See JOHN A. RUBEN
- BRADSHAW, WILLIAM E. See JEFFREY J. HARD
- BRETAGNOLLE, VINCENT. Adaptive significance of seabird coloration: the case of procellariiforms, 141
- BROOKS, DANIEL R., and DEBORAH A. MCLENNAN. Comparative study of adaptive radiations with an example using parasitic flatworms (Platyhelminthes: Cercomeria), 755
- BROWN, JAMES H., PABLO A. MARQUET, and MARK L. TAPER. Evolution of body size: consequences of an energetic definition of fitness, 573
- BRYANT, D. M. See J. R. SPEAKMAN
- CHAPIN, F. STUART, III, KELLAR AUTUMN, and FRANCISCO PUGNAIRE. Evolution of suites of traits in response to environmental stress, 578
- CHARNOV, E. L., D. BERRIGAN, and R. SHINE. The M/k ratio is the same for fish and reptiles, 707
- COHEN, JOEL E. See FUGO TAKASU
- COPPOCK, D. LAYNE. See ELISABETH A. HOLLAND
- CROWDER, L. B. See D. L. DEANGELIS
- DAVIS, ANDREW W. See CHUNG-I WU
- DEANGELIS, D. L., K. A. ROSE, L. B. CROWDER, E. A. MARSCHALL, and D. LIKA. Fish cohort dynamics: application of complementary modeling approaches, 604
- DE ROOS, ANDRE M. See EDWARD MCCAULEY
- DETLING, JAMES K. See ELISABETH A. HOLLAND
- DIAMOND, JARED, and STUART PIMM. Survival times of bird populations: a reply, 1030
- DIEHL, SEBASTIAN, PETER A. LUNDBERG, HANS GARDFJELL, LAURI OKSANEN, and LENNART PERSSON. *Daphnia*-phytoplankton interactions in lakes: is there a need for ratio-dependent consumer-resource models? 1052
- EBERHARD, WILLIAM G. Evaluating models of sexual selection: genitalia as a test case, 564
- FARRELL, BRIAN. See BRIAN M. WIEGMANN
- FORBES, L. SCOTT. Avian brood reduction and parent-offspring "conflict," 82
- GARDFJELL, HANS. See SEBASTIAN DIEHL
- GEORGE, T. LUKE. See C. RICHARD TRACY
- GETTY, THOMAS. Eitatum: search tactics and frequency-dependent prey detection, 736
- GUYER, CRAIG. See JOSEPH B. SLOWINSKI
- GYLLENBERG, MATS. See ILKKA HANSKI
- HAILA, YRJÖ, and ILPO K. HANSKI. Birds breeding on small British islands and extinction risks, 1025
- HAINSWORTH, F. REED, and TRACY HAMILL.

- Foraging rules for nectar: food choices by painted ladies, 857
- HAIRSTON, NELSON G., JR., and NELSON G. HAIRSTON, SR. Cause-effect relationships in energy flow, trophic structure, and interspecific interactions, 379
- HAIRSTON, NELSON G., SR. See NELSON G. HAIRSTON, JR.
- HALL, DAVID W. See PETER H. THRALL
- HAMILL, TRACY. See F. REED HAINSWORTH
- HANSKI, ILKKA, and MATS GYLLENBERG. Two general metapopulation models and the core-satellite species hypothesis, 17
- HANSKI, ILPO K. See YRJÖ HAILA
- HARD, JEFFREY J., WILLIAM E. BRADSHAW, and CHRISTINA M. HOLZAPFEL. The genetic basis of photoperiodism and its evolutionary divergence among populations of the pitcher-plant mosquito, *Wyeomyia smithii*, 457
- HAUSER, MARC D. The evolution of nonhuman primate vocalizations: effects of phylogeny, body weight, and social context, 528
- HAWKINS, BRADFORD A. See MICHAEL E. HOCHBERG
- HEAP, DAVID. See KLAUS ROHDE
- HEAP, MAUREEN. See KLAUS ROHDE
- HÉBERT, PERCY N., and SPENCER G. SEALY. Hatching asynchrony and feeding rates in yellow warblers: a test of the sexual conflict hypothesis, 881
- HERTZ, PAUL E., RAYMOND B. HUEY, and R. D. STEVENSON. Evaluating temperature regulation by field-active ectotherms: the fallacy of the inappropriate question, 796
- HIGASHI, M., and N. YAMAMURA. What determines animal group size? insider-outsider conflict and its resolution, 553
- HILLESHEIM, ELKE. See STEPHEN C. STEARNS
- HOCHBERG, MICHAEL E., and BRADFORD A. HAWKINS. Predicting parasitoid species richness, 671
- HOCHWENDER, CRIS. See VICTORIA L. SORK
- HOFFMANN, ARY A., and MARCUS WATSON. Geographical variation in the acclimation responses of *Drosophila* to temperature extremes, S93
- HOLLAND, ELISABETH A., WILLIAM J. PARTON, JAMES K. DETLING, and D. LAYNE COPPOCK. Erratum: physiological responses of plant populations to herbivory and their consequences for ecosystem nutrient flow, 572
- HOLMES, ELIZABETH ELI. Are diffusion models too simple? a comparison with telegraph models of invasion, 779
- HOLT, ROBERT D., and JOHN H. LAWTON. Apparent competition and enemy-free space in insect host-parasitoid communities, 623
- HOLZAPFEL, CHRISTINA M. See JEFFREY J. HARD
- HOWARTH, FRANCIS G. High-stress subterranean habitats and evolutionary change in cave-inhabiting arthropods, S65
- HUEY, RAYMOND B. See PAUL E. HERTZ
- HUEY, RAYMOND B., and JOEL G. KINGSOLVER. Evolution of resistance to high temperature in ectotherms, S21
- JOHNSON, NORMAN A., and CHUNG-I WU. Evolution of postmating reproductive isolation: measuring the fitness effects of chromosomal regions containing hybrid male sterility factors, 213
- KAISER, MARCEL. See STEPHEN C. STEARNS
- KAITALA, ARJA, VEIJO KAITALA, and PER LUNDBERG. A theory of partial migration, 59
- KAITALA, VEIJO. See ARJA KAITALA
- KAWASAKI, KOHKICHI. See FUGO TAKASU
- KINGSOLVER, JOEL G. See RAYMOND B. HUEY
- LANDE, RUSSELL. Risks of population extinction from demographic and environmental stochasticity and random catastrophes, 911
- LAWTON, JOHN H. See ROBERT D. HOLT
- LENSKI, RICHARD E., and ALBERT F. BENNETT. Evolutionary response of *Escherichia coli* to thermal stress, S47
- LIKA, D. See D. L. DEANGELIS
- LINDSTRÖM, KAI. See ESA RANTA
- LOBUE, CARL P., and MICHAEL A. BELL. Phenotypic manipulation by the cestode parasite *Schistocephalus solidus* of its intermediate host, *Gasterosteus aculeatus*, the threespine stickleback, 725
- LUNDBERG, PER. See ARJA KAITALA
- LUNDBERG, PETER A. See SEBASTIAN DIEHL

- MACK, ANDREW L. The sizes of vertebrate-dispersed fruits: a Neotropical-Paleotropical comparison, 840
- MANGEL, MARC. See BERNARD D. ROITBERG
- MARQUET, PABLO A. See JAMES H. BROWN
- MARSHALL, E. A. See D. L. DEANGELIS
- MARTIN, THOMAS E. Evolutionary determinants of clutch size in cavity-nesting birds: nest predation or limited breeding opportunities? 937
- MARTINS, EMÍLIA P. A comparative study of the evolution of *Sceloporus* push-up displays, 994
- MCCAULEY, EDWARD, WILLIAM G. WILSON, and ANDRE M. DE ROOS. Dynamics of age-structured and spatially structured predator-prey interactions: individual-based models and population-level formulations, 412
- MCLENNAN, DEBORAH A. See DANIEL R. BROOKS
- MITTER, CHARLES. See BRIAN M. WIEGMANN
- MØLLER, A. P., and T. R. BIRKHEAD. Cuckoldry and sociality: a comparative study of birds, 118
- MOORE, ROBERT D. See ANDREW SIH
- NAKAMURA, HIROSHI. See FUGO TAKASU
- NILSSON, JAN-ÅKE. Bisexual incubation facilitates hatching asynchrony, 712
- OKSANEN, LAURI. See SEBASTIAN DIEHL
- PARSONS, PETER A. Introduction: the stressful scenario, S1
- . The importance and consequences of stress in living and fossil populations: from life-history variation to evolutionary change, S5
- PARTON, WILLIAM J. See ELISABETH A. HOLLAND
- PERSSON, LENNART. See SEBASTIAN DIEHL
- PETERSON, A. TOWNSEND. Adaptive geographical variation in bill shape of scrub jays (*Aphelocoma coerulescens*), 508
- PHILIPPI, THOMAS. Bet-hedging germination of desert annuals: beyond the first year, 474
- . Bet-hedging germination of desert annuals: variation among populations and maternal effects in *Lepidium lasiocarpum*, 488
- PIGLIUCCI, MASSIMO. See CARL D. SCHLICHTING
- PIMM, STUART. See JARED DIAMOND
- PORTER, WARREN P. See STEPHEN C. ADOLPH
- PUGNAIRE, FRANCISCO. See F. STUART CHAPIN III
- QUELLER, DAVID C. Worker control of sex ratios and selection for extreme multiple mating by queens, 346
- QUESADA, MAURICIO, JAMES A. WINSOR, and ANDREW G. STEPHENSON. Effects of pollen competition on progeny performance in a heterozygous cucurbit, 694
- RANTA, ESA, HANNU RITA, and KAI LINDSTRÖM. Competition versus cooperation: success of individuals foraging alone and in groups, 42
- REAGAN, NANCY L. See JOHN A. RUBEN
- RIDLEY, MARK. Clutch size and mating frequency in parasitic Hymenoptera, 893
- RITA, HANNU. See ESA RANTA
- ROHDE, KLAUS, MAUREEN HEAP, and DAVID HEAP. Rapoport's rule does not apply to marine teleosts and cannot explain latitudinal gradients in species richness, 1
- ROITBERG, BERNARD D., and MARC MANGEL. Parent-offspring conflict and life-history consequences in herbivorous insects, 443
- ROSE, K. A. See D. L. DEANGELIS
- ROSE, KENNETH A. See KIRK O. WINE-MILLER
- RUBEN, JOHN A., NANCY L. REAGAN, PAUL A. VERRELL, and ARTHUR J. BOUCOT. Plethodontid salamander origins: a response to Beachy and Bruce, 1038
- RYPSTRA, ANN LUNDIE. Prey size, social competition, and the development of reproductive division of labor in social spider groups, 868
- SABELIS, MAURICE W. See MINUS VAN BAALEN
- SCHEINER, SAMUEL M. Plasticity as a selectable trait: reply to Via, 371
- SCHLICHTING, CARL D., and MASSIMO PIGLIUCCI. Control of phenotypic plasticity via regulatory genes, 366
- SEALY, SPENCER G. See PERCY N. HÉBERT
- SHIGESADA, NANAKO. See FUGO TAKASU

- SHINE, R. See E. L. CHARNOV
 SHUMWAY, SCOTT W. See MARK D. BERTNESS
- SIH, ANDREW, and ROBERT D. MOORE. Delayed hatching of salamander eggs in response to enhanced larval predation risk, 947
- SLOWINSKI, JOSEPH B., and CRAIG GUYER. Testing whether certain traits have caused amplified diversification: an improved method based on a model of random speciation and extinction, 1019
- SORK, VICTORIA L., KIRK A. STOWE, and CRIS HOCHWENDER. Evidence for local adaptation in closely adjacent subpopulations of northern red oak (*Quercus rubra* L.) expressed as resistance to leaf herbivores, 928
- SPEAKMAN, J. R., and D. M. BRYANT. The searching speeds of foraging shorebirds: redshank (*Tringa totanus*) and oystercatcher (*Haematopus ostralegus*), 296
- STEARNS, STEPHEN C., MARCEL KAISER, and ELKE HILLESHEIM. Effects on fitness components of enhanced expression of elongation factor EF-1 α in *Drosophila melanogaster*. I. The contrasting approaches of molecular and population biologists, 961
- STEPHENSON, ANDREW G. See MAURICIO QUESADA
- STEVENSON, R. D. See PAUL E. HERTZ
- STOWE, KIRK A. See VICTORIA L. SORK
- TAKASU, FUGO, KOHKICHI KAWASAKI, HIROSHI NAKAMURA, JOEL E. COHEN, and NANAKO SHIGESADA. Modeling the population dynamics of a cuckoo-host association and the evolution of host defenses, 819
- TAPER, MARK L. See JAMES H. BROWN
- THRALL, PETER H., JANIS ANTONOVICS, and DAVID W. HALL. Host and pathogen coexistence in sexually transmitted and vector-borne diseases characterized by frequency-dependent disease transmission, 543
- TRACY, C. RICHARD, and T. LUKE GEORGE. Extinction probabilities for British island birds: a reply, 1036
- VAN BAALEN, MINUS, and MAURICE W. SABELIS. Coevolution of patch selection strategies of predator and prey and the consequences for ecological stability, 646
- VERRELL, PAUL A. See JOHN A. RUBEN
- VIA, SARA. Adaptive phenotypic plasticity: target or by-product of selection in a variable environment? 352
 ———. Regulatory genes and reaction norms, 374
- WATSON, MARCUS. See ARY A. HOFFMANN
- WERNER, EARL E., and BRADLEY R. ANHOLT. Ecological consequences of the trade-off between growth and mortality rates mediated by foraging activity, 242
- WERREN, JOHN H., and LEO W. BEUKEBOOM. Population genetics of a parasitic chromosome: theoretical analysis of PSR in subdivided populations, 224
- WIEGMANN, BRIAN M., CHARLES MITTER, and BRIAN FARRELL. Diversification of carnivorous parasitic insects: extraordinary radiation or specialized dead end? 737
- WILSON, WILLIAM G. See EDWARD MCCAULEY
- WINEMILLER, KIRK O., and KENNETH A. ROSE. Why do most fish produce so many tiny offspring? 585
- WINSOR, JAMES A. See MAURICIO QUESADA
- WU, CHUNG-I. See NORMAN A. JOHNSON
- WU, CHUNG-I, and ANDREW W. DAVIS. Evolution of postmating reproductive isolation: the composite nature of Haldane's rule and its genetic bases, 187
- XIA, XUHUA. A full sibling is not as valuable as an offspring: on Hamilton's rule, 174
- YAMAMURA, N. See M. HIGASHI

Alphabetical Table of Contents of Titles

- | | |
|---|--|
| Adaptive geographical variation in bill shape of scrub jays (<i>Aphelocoma coerulescens</i>). A. Townsend Peterson, 508 | Adaptive phenotypic plasticity: target or by-product of selection in a variable environment? Sara Via, 352 |
| | Adaptive significance of seabird color- |

- ation: the case of procellariiforms. Vincent Bretagnolle, 141
- Apparent competition and enemy-free space in insect host-parasitoid communities. Robert D. Holt and John H. Lawton, 623
- Are diffusion models too simple? a comparison with telegraph models of invasion. Elizabeth Eli Holmes, 779
- Avian brood reduction and parent-offspring "conflict." L. Scott Forbes, 82
- Bet-hedging germination of desert annuals: beyond the first year. Thomas Philippi, 474
- Bet-hedging germination of desert annuals: variation among populations and maternal effects in *Lepidium lasiocarpum*. Thomas Philippi, 488
- Birds breeding on small British islands and extinction risks. Yrjö Haila and Ilpo K. Hanski, 1025
- Bisexual incubation facilitates hatching asynchrony. Jan-Åke Nilsson, 712
- Cause-effect relationships in energy flow, trophic structure, and interspecific interactions. Nelson G. Hairston, Jr., and Nelson G. Hairston, Sr., 379
- Clutch size and mating frequency in parasitic Hymenoptera. Mark Ridley, 893
- Coevolution of patch selection strategies of predator and prey and the consequences for ecological stability. Minus van Baalen and Maurice W. Sabelis, 646
- Comparative study of adaptive radiations with an example using parasitic flatworms (Platyhelminthes: Cercomeria). Daniel R. Brooks and Deborah A. McLennan, 755
- A comparative study of the evolution of *Sceloporus* push-up displays. Emilia P. Martins, 994
- Competition and facilitation in marsh plants. Mark D. Bertness and Scott W. Shumway, 718
- Competition versus cooperation: success of individuals foraging alone and in groups. Esa Ranta, Hannu Rita, and Kai Lindström, 42
- Control of phenotypic plasticity via regulatory genes. Carl D. Schlichting and Massimo Pigliucci, 366
- Cuckoldry and sociality: a comparative study of birds. A. P. Møller and T. R. Birkhead, 118
- Daphnia*-phytoplankton interactions in lakes: is there a need for ratio-dependent consumer-resource models? Sebastian Diehl, Peter A. Lundberg, Hans Gardfjell, Lauri Oksanen, and Lennart Persson, 1052
- Delayed hatching of salamander eggs in response to enhanced larval predation risk. Andrew Sih and Robert D. Moore, 947
- Diversification of carnivorous parasitic insects: extraordinary radiation or specialized dead end? Brian M. Wiegmann, Charles Mitter, and Brian Farrell, 737
- Dynamics of age-structured and spatially structured predator-prey interactions: individual-based models and population-level formulations. Edward McCauley, William G. Wilson, and Andre M. de Roos, 412
- Ecological consequences of the trade-off between growth and mortality rates mediated by foraging activity. Earl E. Werner and Bradley R. Anholt, 242
- Effects on fitness components of enhanced expression of elongation factor EF-1 α in *Drosophila melanogaster*. I. The contrasting approaches of molecular and population biologists. Stephen C. Stearns, Marcel Kaiser, and Elke Hillesheim, 961
- Effects of pollen competition on progeny performance in a heterozygous cucurbit. Mauricio Quesada, James A. Winsor, and Andrew G. Stephenson, 694
- Erratum: physiological responses of plant populations to herbivory and their consequences for ecosystem nutrient flow. Elisabeth A. Holland, William J. Parton, James K. Detling, and D. Layne Coppock, 572
- Erratum: search tactics and frequency-dependent prey detection. Thomas Getty, 736
- Evaluating models of sexual selection: genitalia as a test case. William G. Eberhard, 564
- Evaluating temperature regulation by field-active ectotherms: the fallacy of the inappropriate question. Paul E.

- Hertz, Raymond B. Huey, and R. D. Stevenson, 796
- Evidence for local adaptation in closely adjacent subpopulations of northern red oak (*Quercus rubra* L.) expressed as resistance to leaf herbivores. Victoria L. Sork, Kirk A. Stowe, and Cris Hochwender, 928
- Evolutionary determinants of clutch size in cavity-nesting birds: nest predation or limited breeding opportunities? Thomas E. Martin, 937
- Evolutionary response of *Escherichia coli* to thermal stress. Richard E. Lenski and Albert F. Bennett, S47
- Evolution of body size: consequences of an energetic definition of fitness. James H. Brown, Pablo A. Marquet, and Mark L. Taper, 573
- The evolution of nonhuman primate vocalizations: effects of phylogeny, body weight, and social context. Marc D. Hauser, 528
- Evolution of postmating reproductive isolation: the composite nature of Haldane's rule and its genetic bases. Chung-I Wu and Andrew W. Davis, 187
- Evolution of postmating reproductive isolation: measuring the fitness effects of chromosomal regions containing hybrid male sterility factors. Norman A. Johnson and Chung-I Wu, 213
- Evolution of resistance to high temperature in ectotherms. Raymond B. Huey and Joel G. Kingsolver, S21
- Evolution of suites of traits in response to environmental stress. F. Stuart Chapin III, Kellar Autumn, and Francisco Pugnaire, S78
- Extinction probabilities for British island birds: a reply. C. Richard Tracy and T. Luke George, 1036
- Fish cohort dynamics: application of complementary modeling approaches. D. L. DeAngelis, K. A. Rose, L. B. Crowder, E. A. Marschall, and D. Lika, 604
- Foraging rules for nectar: food choices by painted ladies. F. Reed Hainsworth and Tracy Hamill, 857
- A full sibling is not as valuable as an offspring: on Hamilton's rule. Xuhua Xia, 174
- The genetic basis of photoperiodism and its evolutionary divergence among populations of the pitcher-plant mosquito, *Wyeomyia smithii*. Jeffrey J. Hard, William E. Bradshaw, and Christina M. Holzapfel, 457
- Geographical variation in the acclimation responses of *Drosophila* to temperature extremes. Ary A. Hoffmann and Marcus Watson, S93
- Hatching asynchrony and feeding rates in yellow warblers: a test of the sexual conflict hypothesis. Percy N. Hébert and Spencer G. Sealy, 881
- High-stress subterranean habitats and evolutionary change in cave-inhabiting arthropods. Francis G. Howarth, S65
- Host and pathogen coexistence in sexually transmitted and vector-borne diseases characterized by frequency-dependent disease transmission. Peter H. Thrall, Janis Antonovics, and David W. Hall, 543
- The importance and consequences of stress in living and fossil populations: from life-history variation to evolutionary change. Peter A. Parsons, S5
- Interdemic selection and the sex ratio: a social spider perspective. Leticia Avilés, 320
- Introduction: the stressful scenario. Peter A. Parsons, S1
- The M/k ratio is the same for fish and reptiles. E. L. Charnov, D. Berrigan, and R. Shine, 707
- Modeling the population dynamics of a cuckoo-host association and the evolution of host defenses. Fugo Takasu, Kohkichi Kawasaki, Hiroshi Nakamura, Joel E. Cohen, and Nanako Shigesada, 819
- Parent-offspring conflict and life-history consequences in herbivorous insects. Bernard D. Roitberg and Marc Mangel, 443
- Phenotypic manipulation by the cestode parasite *Schistocephalus solidus* of its intermediate host, *Gasterosteus aculeatus*, the threespine stickleback. Carl P. LoBue and Michael A. Bell, 725

- Plasticity as a selectable trait: reply to Via. Samuel M. Scheiner, 371
- Plethodontid salamander origins: a response to Beachy and Bruce. John A. Ruben, Nancy L. Reagan, Paul A. Verrell, and Arthur J. Boucot, 1038
- Population genetics of a parasitic chromosome: theoretical analysis of PSR in subdivided populations. John H. Werren and Leo W. Beukeboom, 224
- Predicting parasitoid species richness. Michael E. Hochberg and Bradford A. Hawkins, 671
- Prey size, social competition, and the development of reproductive division of labor in social spider groups. Ann Lundie Rypstra, 868
- Rapoport's rule does not apply to marine teleosts and cannot explain latitudinal gradients in species richness. Klaus Rohde, Maureen Heap, and David Heap, 1
- Regulatory genes and reaction norms. Sara Via, 374
- Risks of population extinction from demographic and environmental stochasticity and random catastrophes. Russell Lande, 911
- The searching speeds of foraging shorebirds: redshank (*Tringa totanus*) and oystercatcher (*Haematopus ostralegus*). J. R. Speakman and D. M. Bryant, 296
- The sizes of vertebrate-dispersed fruits: a Neotropical-Paleotropical comparison. Andrew L. Mack, 840
- Survival times of bird populations: a reply. Jared Diamond and Stuart Pimm, 1030
- Temperature, activity, and lizard life histories. Stephen C. Adolph and Warren P. Porter, 273
- Testing whether certain traits have caused amplified diversification: an improved method based on a model of random speciation and extinction. Joseph B. Slowinski and Craig Guyer, 1019
- A theory of partial migration. Arja Kaitala, Veijo Kaitala, and Per Lundberg, 59
- Two general metapopulation models and the core-satellite species hypothesis. Ilkka Hanski and Mats Gyllenberg, 17
- What determines animal group size? insider-outsider conflict and its resolution. M. Higashi and N. Yamamura, 553
- Why do most fish produce so many tiny offspring? Kirk O. Winemiller and Kenneth A. Rose, 585
- Worker control of sex ratios and selection for extreme multiple mating by queens. David C. Queller, 346
